NJM2551

100MHz Input Mixer & 450kHz FM/AM IF Demodulator IC

■ GENERAL DESCRIPTION

The NJM2551 is a FM IF demodulator IC with 450MHz (standard) IF input, which operates from 1.8V supply. It includes an oscillator, mixer, limiting amplifier, and FM/AM detectors.

■ PACKAGE OUTLINE

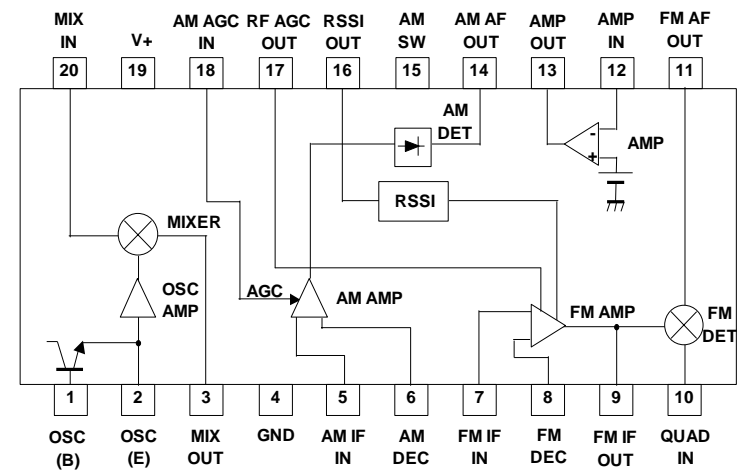

NJM2551V

■ FEATURES

- Low Operating Voltage 1.8V to 9.0V
- Low Operating Current FM 2.5mA at V⁺=2V
AM 4.0mA at V⁺=2V
- Operating Frequency Up to 100MHz (reference value)
- IF Input Frequency 450kHz (standard)
- Bipolar Technology
- Package Outline SSOP20
